

SHORT BUT SWEET

CENTRI™ III WHITE

Our own range of Class III plasters have launched with incredible success and we are delighted to unveil the newest member of the family.

Centri™ III White is very hard, clean crisp white and is of high quality, making it suitable for many indications. It produces accurate and chip resistant models. The creamy consistency and ease of use could mean that Centri™ III becomes your plaster of choice.

RENFERT EASY BLANK WAX

High stability milling wax disc for the production of digitally designed crown and bridge work.

Benefits:

- Precise, millable results with extremely smooth surfaces and strong edge stability due to the high degree of material homogeneity
- Especially suitable for full ceramic restorations as the wax will burn-out without residue
- Reliable milling process due to small milled chips which do not stick to the cutter or the object surface
- Highly stable, strong and chip resistant

This incredible wax disc is not like the "others", it stands out because of its outstanding product characteristics: high quality raw materials, high material homogeneity, outstanding fit and smooth surface finish. All of which will then be transferred and ultimately achieved in the final restoration.

We believe that you need to try this disc for yourself, so we have created this incredible offer. Limited to one per customer and while stocks last on a first come, first serve basis.
